Volume Contents

Number 1. July

1 **Relative Abundance of Ureides and Nitrate in Plant Tissues of Soybean as a Quantitative Assay of Nitrogen Fixation**—David F. Herridge

7 **Use of the Ureide Technique to Describe the Nitrogen Economy of Field-Grown Soybeans**—David F. Herridge

12 **Characterization of the Oligosaccharides from Lipid-Linked Oligosaccharides of Mung Bean Seedlings**—Hidetaka Hori and Alan D. Elbein

21 **A Simple Method for the Determination of Resistance to Gas Diffusion in Plant Organs**—Arthur C. Cameron and Shang Fa Yang

24 **Characterization of Chloroplasts Isolated from Triazine-Susceptible and Triazine-Resistant Biotypes of *Brassica campestris* L.**—John J. Burke, Richard F. Wilson, and James R. Swafford

30 **Cryostorage of Cloned Amino Acid Analog-Resistant Carrot and Tobacco Suspension Cultures**—Randal M. Hauptmann and Jack M. Widholm

35 **Differential Effect of Tungsten on the Development of Endogenous and Nitrate-Induced Nitrate Reductase Activities in Soybean Leaves**—Muhammad Aslam

39 **ATP Sulfurylase from Higher Plants. Purification and Preliminary Kinetics Studies on the Cabbage Leaf Enzyme**—Timothy Osslund, Carol Chandler, and Irwin H. Segel

46 **Uptake and Effects of N^6-Benzyladenine in Excised Watermelon Cotyledons. Influence of Cotyledon Age**—Raffaella Fantelli, Orietta Rosti, Giovanna P. Longo, Claudio P. Longo, and Gianfranca Rossi

50 **Nitrate Uptake into Barley (*Hordeum vulgare*) Plants. A New Approach Using $^{36}ClO_3^-$ as an Analog for NO_3^-**—Celia E. Deane-Drummond and Anthony D. M. Glass

55 ***De Novo* Purine Synthesis in Nitrogen-Fixing Nodules of Cowpea (*Vigna unguiculata* [L.] Walp.) and Soybean (*Glycine max* [L.] Merr.)**—Craig A. Atkins, Anne Ritchie, Peter B. Rowe, Eric McCairns, and Dorit Sauer

61 **Regulation of Glycine Decarboxylase and L-Serine Hydroxymethyltransferase Activities by Glyoxylate in Tobacco Leaf Mitochondrial Preparations**—Richard B. Peterson

67 **Germination of Wheat Embryos and the Transport of Amino Acids into a Protein Synthesis Precursor Pool**—Loren Marsh, Ketaki Datta, and Abraham Marcus

74 **Localization of the Enzymes of Quinolizidine Alkaloid Biosynthesis in Leaf Chloroplasts of *Lupinus Polyphyllus***—Michael Wink and Thomas Hartmann

78 **Effect of BASF 13-338, a Substituted Pyridazinone, on Lipid Metabolism in Leaf Tissue of Spinach, Pea, Linseed, and Wheat**—Claude Willemot, C. Roger Slack, John Browse, and P. Grattan Roughan

82 **Cell Surfaces in Plant-Microorganism Interactions. III. *In Vivo* Effect of Ethylene on Hydroxyproline-Rich Glycoprotein Accumulation in the Cell Wall of Diseased Plants**—Alain Toppan, Dominique Roby, and Marie-Thérèse Esquerré-Tugayé

87 **Activation and Deactivation of H^+-ATPase in Intact Chloroplasts**—Yosepha Shahak

92 **Isolation and Characterization of Chloroplast DNA from *Chlorella ellipsoidea***—Takashi Yamada

97 **Relationship between Phospholipid Breakdown and Freezing Injury in a Cell Wall-Less Mutant of *Chlamydomonas reinhardii***—Andrew Clarke, Glyn Coulson, and G. John Morris

104 **Metabolism of 2,4-Dichlorophenoxyacetic Acid in 2,4-Dichlorophenoxyacetic Acid-Resistant Soybean Callus Tissue**—Gayle H. Davidonis, Robert H. Hamilton, and Ralph O. Mumma

108 **Involvement of Glyoxysomal Lipase in the Hydrolysis of Storage Triacylglycerols in the Cotyledons of Soybean Seedlings**—Yon-hui Lin, Robert A. Moreau, and Anthony H. C. Huang

113 **A Thioredoxin-Mediated Activation of Glutamine Synthetase and Glutamate Synthase in Synchronous *Chlorella sorokiniana***—Rudolf Tischner and Ahlert Schmidt

117 **Recycling of 5'-Methylthioadenosine-Ribose Carbon Atoms into Methionine in Tomato Tissue in Relation to Ethylene Production**—S. Y. Wang, D. O. Adams, and M. Lieberman

122 **Cytochrome P-450-Dependent ω-Hydroxylation of Lauric Acid by Microsomes from Pea Seedlings**—Irène Benveniste, Jean-Pierre Salaün, Annick Simon, Danièlle Reichhart, and Francis Durst.

127 **Adaptive Changes in ATPase Activity in the Cells of Winter Wheat Seedlings during Cold Hardening**—Ling-Cheng Jian, Long-Hua Sun, and He-Zhu Dong

132 **Relationships of Leaf Fatty Acids to Cold Hardening of Citrus Seedlings**—Harold E. Nordby and George Yelenosky

136 **Effects of Exogenous Ethylene on Ethylene Production in Citrus Leaf Tissue**—Joseph Riov and Shang Fa Yang

142 **Stimulation of Ethylene Production in Citrus Leaf Discs by Mannitol**—Joseph Riov and Shang Fa Yang

147 **Enzymic Mechanism of Starch Breakdown in Germinating Rice Seeds. 12. Biosynthesis of α-Amylase in Relation to Protein Glycosylation**—Susumu Miyata and Takashi Akazawa

154 **Photosynthetic Electron Transfer in Preparations of the Cyanobacterium *Spirulina platensis***—Steven J. Robinson, Cathy Selvius DeRoo, and Charles F. Yocum

162 **Ethylene Biosynthesis and Cadmium Toxicity in Leaf Tissue of Beans (*Phaseolus vulgaris* L.)**—Jürg Fuhrer

168 **Potassium Nutrition and Translocation in Sugar Beet**—Terrance R. Conti and Donald R. Geiger

173 **Cytokinin Structure-Activity Relationships and the Metabolism of N^6-(Δ^2-Isopentenyl)Adenosine-8-^{14}C in *Phaseolus* Callus Tissues**—Machteld C. Mok, David W. S. Mok, Susan C. Dixon, Donald J. Armstrong, and Gordon Shaw

179 **Photosynthetic O_2 Exchange Kinetics in Isolated Soybean Cells**—Paul W. Behrens, Thomas V. Marsho, and Richard J. Radmer

186 **Promotion of Growth and Hydrogen Ion Efflux by Auxin in Roots of Maize Pretreated with Ethylene Biosynthesis Inhibitors**—Timothy J. Mulkey, Konrad M. Kuzmanoff, and Michael L. Evans

189 **Patterns of Urease Synthesis in Developing Soybeans**—Joseph C. Polacco and Robert B. Sparks, Jr.

195 **Stereospecific Conversion of 1-Aminocyclopropanecarboxylic Acid to Ethylene by Plant Tissues. Conversion of Stereoisomers of 1-Amino-2-Ethylcyclopropanecarboxylic Acid to 1-Butene**—Neil E. Hoffman, Shang Fa Yang, Akitama Ichihara, and Sadao Sakamura

200 **Effects of High-Temperature Stress on Various Biomembranes of Leaf Cells *In Situ* and *In Vitro***—Regina

Thebud and Kurt A. Santarius

206 **Regulation by Lipids of Plant Microsomal Enzymes. III. Phospholipid Dependence of the Cytidine-Diphospho-Choline Phosphotransferase of Potato Microsomes**—Alain Jolliot, Anne-Marie Justin, Evelyne Bimont, and Paul Mazliak

211 **Diurnal Changes in the Chilling Sensitivity of Seedlings**—Ann I. King, Michael S. Reid, and Brian D. Patterson

215 **Growth Temperature-Induced Alterations in the Thermotropic Properties of *Nerium oleander* Membrane Lipids**—John K. Raison, Carl S. Pike, and Joseph A. Berry

219 **δ-Aminolevulinic Acid Synthase of *Euglena gracilis*: Regulation of Activity**—Terrence Foley, Valdis Dzelzkalns, and Samuel I. Beale

227 **Isolation and Quantitation of β-D-Glucopyranosyl Abscisate from Leaves of *Xanthium* and Spinach**—Gregory L. Boyer and Jan A. D. Zeevaart

232 ***Evidence that Envelope and Thylakoid Membranes from* Pea Chloroplasts Lack Glycoproteins**—Kenneth Keegstra and Kenneth Cline

238 **Effect of Water Stress on Cotton Leaves. I. An Electron Microscopic Stereological Study of the Palisade Cells**—Jerry Berlin, J. E. Quisenberry, Franklin Bailey, Margaret Woodworth, and B. L. McMichael

244 **Cytohistochemical Techniques for Calcium Localization and Their Application to Diseased Plants**—Virginia Stockwell and Penelope Hanchey

252 **Biosynthesis of Starch in Proplastids of Germinating *Ricinus communis* Endosperm Tissue**—Paul H. Reibach and C. R. Benedict

*****

257 ***Growth, Pigment Synthesis, and Ultrastructural Responses of Phaseolus vulgaris* L. cv. Blue Lake to Intermittent and Flashing Light**—Aubrey W. Naylor and Lawrence J. Giles

264 **Physiology of Movements in Stems in Seedling *Pisum sativum* L. cv. Alaska. I. Experimental Separation of Nutation from Gravitropism**—Steven J. Britz and Arthur Galston

272 **Interaction of the Circadian Cycle with the Cell Cycle in *Pyrocystis fusiformis***—Beatrice M. Sweeney

277 **Photoperiodic Control of Flowering in Dark-Grown Seedlings of *Pharbitis nil* Choisy. The Effect of Skeleton and Continuous Light Photoperiods**—Peter Lumsden, Brian Thomas, and Daphne Vince-Prue

283 **Metabolism of Exogenous Indoleacetic Acid to Its Amide Conjugates in *Cucumis sativus* L.**—William K. Purves and Stanley M. Hollenberg

287 **Influence of Giving Salicylic Acid for Different Time Periods on Flowering and Growth in the Long-Day Plant *Lemna gibba* G3**—Charles F. Cleland and Yosef Ben-Tal

291 **Uptake and Metabolism of [^{14}C]Salicylic Acid in *Lemna gibba* G3**—Yosef Ben-Tal and Charles F. Cleland

297 **Cell Division Cycles and Circadian Clocks. Phase-Response Curves for Light Perturbations in Synchronous Cultures of *Euglena***—Leland N. Edmunds, Jr., Doranne E. Tay, and Danielle L. Laval-Martin

303 **Comparison of Photoperiodic Sensitivity of Green-Leafed and Red-Leafed *Perilla***—William P. Jacobs

307 **Effects of a Triterpenoid Saponin on Spectral Properties of Undegraded Pea Phytochrome**—Koji Konomi, Masaki Furuya, Kotaro T. Yamamoto, Takao Yokota, and Nobutaka Takahashi

311 ***Epinephrine, Propranolol, and Sucrose-Ammonium Inhibition of Flowering in Lemna paucicostata* 6746**—Janet M. Ives and Herbert B. Posner

SHORT COMMUNICATIONS

313 **Activity of Enzymes of Arginine Metabolism in the Cotyledons of Developing and Germinating Pea Seeds**—Hans de Ruiter and Chris Kollöffel

316 **Nucleoside Diphosphate Levels in Taproots and Fibrous Roots of *Beta vulgaris* L. Implications for Control of Sucrose Allocation between Two Sinks**—John E. Silvius, Freeman W. Snyder, and Diane F. Kremer

318 **Calcium Influx into Corn Roots as a Result of Cold Shock**—Graziano Zocchi and John B. Hanson

320 **Role of Boron in the Far-Red Delay of Nyctinastic Closure of *Albizzia* Pinnules**—Takuma Tanada

322 **Source-Sink Relations in Maize Mutants with Starch-Deficient Endosperms**—Karen E. Koch, Chi-Lin Tsui, Larry E. Schrader, and Oliver E. Nelson

326 **Isolation of NADH Oxidation System from the Plasmalemma of Corn Root Protoplasts**—Willy Lin

329 **Correction**

Number 2. August

331 **Electrical Changes in the Apical Cell of the Fern Gametophyte during Irradiation with Photomorphogenetically Active Light**—Richard H. Racusen and Todd J. Cooke

335 ***Sorbitol Metabolism and Sink-Source Interconversions in* Developing Apple Leaves**—Wayne H. Loescher, Gary C. Marlow, and Robert A. Kennedy

340 **Studies on the Aminotransferases Participating in the Glycolate Metabolism of the Alga *Mougeotia***—U. Winkler, W. Säftel, and H. Stabenau

344 **Purine Catabolism in Plants. Purification and Some Properties of Inosine Nucleosidase from Yellow Lupin (*Lupinus luteus* L.) Seeds**—Andrzej Guranowski

350 ***Effect of Butanedioic Acid Mono (2,2-Dimethylhydrazide)* on the Activity of Membrane-Bound Succinate Dehydrogenase**—Raymond M. See and Chester L. Foy

353 **Developmental Formation of Glutamine Synthetase in Greening Pumpkin Cotyledons and Its Subcellular Localization**—Mikio Nishimura, Parichart Bhusawang, Kazimierz Strzalka, and Takeshi Akazawa

357 **Biological Properties of D-Amino Acid Conjugates of 2,4-D**—Gayle H. Davidonis, Robert H. Hamilton, Remo P. Vallejo, Robert Buly, and Ralph O. Mumma

361 ***Simultaneous Measurement of Acetylene Reduction and* Respiratory Gas Exchange of Attached Root Nodules**—Lawrence J. Winship and John D. Tjepkema

366 **Reversible Light-Activation of Ribulose Biphosphate Carboxylase/Oxygenase in Isolated Barley Protoplasts and Chloroplasts**—Richard C. Sicher

370 **Photocontrol of the Functional Coupling between Photosynthesis and Stomatal Conductance in the Intact Leaf. Blue Light and PAR-Dependent Photosystems in Guard Cells**—Eduardo Zeiger and Christopher Field

376 **Physical Properties of Mitochondrial Lipids from *Lycopersicon hirsutum***—Adam W. Dalziel and R. William Breidenbach

381 **A Mutant of *Arabidopsis thaliana* Which Lacks Activation of RuBP Carboxyase *In Vivo***—C. R. Somerville, Archie R. Portis, Jr., and William L. Ogren

388 **Enzymes for Acetaldehyde and Ethanol Formation in Legume Nodules**—Shigeyuki Tajima and Thomas A. LaRue

393 **Effects of the Relative Extrachloroplastic Concentrations**

of Inorganic Phosphate, 3-Phosphoglycerate, and Dihydroxyacetone Phosphate on the Rate of Starch Synthesis in Isolated Spinach Chloroplasts—Archie R. Portis, Jr.

397 **Dark Metabolism of Carbon Monoxide in Lettuce Leaf Discs**—Galen D. Peiser, Ma. Concepcion, C. Lizada, and Shang Fa Yang

401 **Interaction of a Hydroxyproline-Rich Glycoprotein from Tobacco Callus with Potential Pathogens**—Jay E. Mellon and John P. Helgeson

406 **Host-Pathogen Interactions. XXI. Extraction of a Heat-Labile Elicitor of Phytoalexin Accumulation from Frozen Soybean Stems**—Gary D. Lyon and Peter Albersheim

410 **Identification of the Leaf Vacuole as a Major Nitrate Storage Pool**—Robert C. Granstedt and Ray C. Huffaker

414 **Evidence of Singlet Oxygen Participation in the Chlorophyll-Sensitized Photooxidation of Indoleacetic Acid**—James L. Koch, Robert M. Oberlander, Imre A. Tamas, Janice L. Germain, and Debra B. Sherman Ammondson

418 **Structural Changes in Thylakoid Proteins during Cold Accumulation and Freezing of Winter Rye (*Secale cereale* L. cv. Puma)**—Marilyn Griffith, Gregory N. Brown, and Norman P. A. Huner

424 **Effect of Trypsin Treatment of Photosystem I Particles on the Electron Donation to P700**—Ravindra Bhardwaj, Kent O. Burkey, Baishnab C. Tripathy, and Elizabeth L. Gross

430 **Emission of Hydrogen Sulfide by Leaf Tissue in Response to L-Cysteine**—Jiro Sekiya, Ahlert Schmidt, Lloyd G. Wilson, and Philip Filner

437 **Resistance to Injury by Sulfur Dioxide. Correlation with Its Reduction to, and Emission of, Hydrogen Sulfide in Cucurbitaceae**—Jiro Sekiya, Lloyd G. Wilson, and Philip Filner

442 **Direct Spectrophotometric Measurement of Photosystem I and Photosystem II Activities of Photosynthetic Membrane Preparations from *Cyanophora paradoxa*, *Phormidium laminosum*, and Spinach**—Leo P. Vernon and Stephen Cardon

446 **Interactions between Nitrogen Fixation, Mycorrhizal Colonization, and Host-Plant Growth in the *Phaseolus-Rhizobium-Glomus* Symbiosis**—Gabor J. Bethlenfalvay, Raymond S. Pacovsky, Henry G. Bayne, and Allan E. Stafford

451 **The ε Subunit of the Chloroplast Coupling Factor 1 from *Eugelena gracilis*. A Possible Role in Controlling ATPase Activity**—Joseph S. Kahn

456 **Emission of Hydrogen Sulfide from Sulfur Dioxide-Fumigated Pine Trees**—Jan-Erik Hällgren and Sten-Åke Fredriksson

460 **Mechanical Properties of the Rice Panicle**—Wendy Kuhn Silk, Lily L. Wang, and Robert E. Cleland

465 **^{15}N Abundance of Nodules as an Indicator of N Metabolism in N_2-Fixing Plants**—Georgia Shearer, Lori Feldman, Barbara A. Bryan, Jerri L. Skeeters, Daniel H. Kohl, Nöelle Amarger, Françoise Mariotti, and André Mariotti

469 **The Effects of Cyanide and Azide on the Photoreduction of 3-Phosphoglycerate and Oxaloacetate by Wild Type and Two Reductive Pentose Phosphate Cycle Mutants of *Chlamydomonas reinhardtii***—William R. Belknap and Robert K. Togasaki

476 **Metabolism and Translocation of Allantoin in Ureide-Producing Grain Legumes**—Craig A. Atkins, John S. Pate, Anne Ritchie, and Mark B. Peoples

483 **Organelle-Bound Malate Dehydrogenase Isoenzymes Are Synthesized as Higher Molecular Weight Precursors**—Christine Gietl and Bertold Hock

488 **Photosynthesis in Submersed Macrophytes of a Temperate Lake**—Sven Beer and Robert G. Wetzel

493 **Different Rates of Metabolism of Soybean Proteinase Inhibitors during Germination**—Anna L. Tan-Wilson, Berit R. Rightmire, and Karl A. Wilson

498 **Characterization of Nigericin-Stimulated ATPase from Sealed Microsomal Vesicles of Tobacco Callus**—Heven Sze

506 **Induction of Flavonoid Synthesizing Enzymes by Light in Etiolated Pea (*Pisum sativum* cv. Midfreezer) Seedlings**—Geza Hrazdina and Grace F. Parsons

511 **Citrate Transport in Corn Mitochondria**—Paul R. Birnberg, Deborah L. Jayroe, and John B. Hanson

517 **Photosynthesis and Inorganic Carbon Usage by the Marine Cyanobacterium, *Synechococcus* sp.**—Murray R. Badger and T. John Andrews

524 **Regulation of Sulfate Assimulation in Plants. XIII. Assimilatory Sulfate Reduction during Ontogenesis of Primary Leaves of *Phaseolus vulgaris* L.**—D. Schmutz and Christian Brunold

528 **Uptake of Benzyladenine by Tuber Slices of Jerusalem Artichoke (*Helianthus tuberosus* L.) over a Wide Concentration Range**—Subhash C. Minocha and Per Nissen

532 **The Influence of Gibberellic Acid and Temperature on the Growth Rate of *Avena sativa* Stem Segments**—Manfred Jusaitis, Leslie G. Paleg, and Donald Aspinall

540 **Participation of Ornithine Decarboxylase in Early Stages of Tomato Fruit Development**—Ephraim Cohen, Shoshana (Malis) Arad, Yair M. Heimer, and Yosef Mizrahi

544 **Ornithine Decarboxylase and Arginine Decarboxylase Activities in Meristematic Tissues of Tomato and Potato Plants**—Ephraim Cohen, Yair M. Heimer, and Yosef Mizrahi

547 **Ethephone-Induced Gummosis in Sour Cherry (*Prunus cerasus* L.). I. Effect on Xylem Function and Shoot Water Status**—William C. Olien and Martin J. Bukovac

556 **Ethephon-Induced Gummosis in Sour Cherry (*Prunus cerasus* L.). II. Flow Characteristics of Gum Solutions**—William C. Olien and Martin J. Bukovac

560 **A Comparison of Soybean Agglutinin in Cultivars Resistant and Susceptible to *Phytophthora megasperma* var. sojae (Race 1)**—Donna M. Gibson, Sharon Stack, Kathryne Krell, and Jan House

567 **Proline Oxidation in Corn Mitochondria. Involvement of NAD, Relationship to Ornithine Metabolism, and Sidedness on the Inner Membrane**—Thomas E. Elthon and Cecil R. Stewart

573 **Properties of a Mixed Function Oxygenase Catalyzing Ipomeamarone 15-Hydroxylation in Microsomes from Cut-Injured and *Ceratocystis fimbriata*-Infected Sweet Potato Root Tissues**—Masayuki Fujita, Kazuka Ôba, and Ikuzo Uritani

579 **Distribution of Lectins in Tissues, Derived Callus, and Roots of *Psophocarpus tetragonolobus* (Winged Bean)**—Toula Meimeth, Kim Tran Thanh Van, Jean-Luc Marcotte, Toan Hahn Trinn, and Adrienne E. Clarke

585 **Inhibition by Adenine Derivatives of the Cyanide-Insensitive Electron Transport Pathway of Plant Mitochondria**—Pierre Dizengremel, Michèle Chauveau, and Jean Roussaux

590 **Differential Protein Composition and Gene Expression in Leaf Mesophyll Cells and Bundle Sheath Cells of the**

C_4 Plant *Digitaria sanguinalis* (L.) Scop.—Jeffrey W. Potter and Clanton C. Black, Jr.

598 **Inhibition of Photosynthesis by Ethylene—A Stomatal Effect**—James E. Pallas, Jr. and Stanley J. Kays

602 **Influence of Growth Temperature on Respiratory Characteristics of Mitochondria from Callus-Forming Potato Tuber Discs**—Anneke M. Hemrika-Wagner, Koos C. M. Kreuk, and Linus H. W. van der Plas

606 **Microautoradiography of Water-Soluble Compounds in Plant Tissue after Freeze-Drying and Pressure Infiltration with Epoxy Resin**—Thomas C. Vogelmann and Richard E. Dickson

610 **Dynamics of Galactolipids and Plastids in Nonphotosynthetic Cells of *Glycine max* Suspension Cultures. A Morphological and Biochemical Study**—Frauke Sabinski, Rudolf H. Barckhaus, Hans G. Fromme, and Friedrich Spener

616 **Influence of Nitrate and Ammonia on Photosynthetic Characteristics and Leaf Anatomy of *Moricandia arvensis***—Klaus Winter, Hideaki Usuda, Mikio Tsuzuki, Mark Schmitt, Gerald E. Edwards, Richard J. Thomas, and Ray F. Evert

SHORT COMMUNICATIONS

626 **Isolation and Identification of a New Growth Inhibitor, Raphanusanin, from Radish Seedlings and Its Role in Light Inhibition of Hypocotyl Growth**—K. Hasegawa, S. Shiihara, T. Iwagawa, and T. Hase

629 **A Transient Burst of CO_2 from Geranium Leaves during Illumination at Various Light Intensities as a Measure of Photorespiration**—H. Max Vines, Alan M. Armitage, Shengsku Chen, Zeng-Ping Tu, and Clanton C. Black, Jr.

Number 3. September

633 **Treatment of the Thylakoid Membrane with Surfactants. Assessment of Effectiveness Using the Chlorophyll *a* Absorption Spectrum**—John P. Markwell and J. Philip Thornber

637 **Functional Organization of the Chlorophyll-Containing Complexes of *Chlamydomonas reinhardi*. A Study of Their Formation and Interconnection with Reaction Centers in the Greening Process of the y-1 Mutant**—Jonathan M. Gershoni, Susana Shochat, Shmuel Malkin, and Itzhak Ohad

645 **3-Phosphoglycerate Phosphatase Activity in Chloroplast Preparations as a Result of Contamination by Acid Phosphatase**—Simon P. Robinson

649 **Photosynthesis and Inorganic Carbon Transport in Isolated *Asparagus* Mesophyll Cells**—George S. Espie and Brian Colman

655 **Leaf Conductance during the Final Season of a Senescing Aspen Branch**—Merrill R. Kaufmann

658 **Modulation of Chloroplast Phosphofructokinase by NADPH. A Mechanism for Linking Light to the Regulation of Glycolysis**—Csaba Cséke, Ann N. Nishizawa, and Bob B. Buchanan

662 **Localization of Spin Labels in Oat Leaf Protoplasts**—Steven P. Briggs, Alfred R. Haug, and Robert P. Scheffer

668 **Interaction of Nitroxide Spin Labels with Chloroplasts**—Steven P. Briggs, Alfred R. Haug, and Robert P. Scheffer

671 **Diurnal Pattern of Translocation and Carbohydrate Metabolism in Source Leaves of *Beta vulgaris* L.**—Bernadette R. Fondy and Donald R. Geiger

677 **Relationship between Net CO_2 Assimilation and Dry Weight Accumulation in Field-Grown Tobacco**—Richard B. Peterson and Israel Zelitch

686 **Trehalose Toxicity in *Cuscuta reflexa*. Cell Wall Synthesis Is Inhibited upon Trehalose Feeding**—K. Velu-thambi, S. Mahadevan, and Ramesh Maheshwari

689 **Insensitivity of Water-Oxidation and Photosystem II Activity in Tomato to Chilling Temperatures**—Bjorn Martin and Donald R. Ort

695 **Enzymic and Nonenzymic Reduction of (+)-Dihydroquercetin to Its 3,4-Diol**—Helen A. Stafford and Hope H. Lester

699 **Suborganellar Localization of Proteinase Catalyzing the Limited Hydrolysis of Pumpkin Globulin**—Ikuko Hara-Nishimura, Mikio Nishimura, Hiroshi Matsubara, and Takashi Akazawa

704 **Nuclear Buoyant Density Determination and the Purification and Characterization of Wild-Type *Neurospora* Nuclei Using Percoll Density Gradients**—Katrin J. Talbot and Peter J. Russell

709 **UV-Stimulated K^+ Efflux from Rose Cells. Counterion and Inhibitor Studies**—Terence M. Murphy and Clyde Wilson

714 **Immobilized Thylakoids in a Cross-Linked Albumin Matrix. Effects of Cations Studied by Electron Microscopy, Fluorescence Emission, Photoacoustic Spectroscopy, and Kinetic Measurements**—Brigitte Thomasset, Thierry Thomasset, Alain Vejux, Joseph Jeanfils, Jean-Noël Barbotin, and Daniel Thomas

723 **Metabolism of *trans*-Aconitic Acid in Maize. II. Regulatory Properties of Two Compartmented Forms of Citrate Dehydrase**—David Brauer and Merle R. Teel

728 **Chloroplast Alkaline Fructose 1,6-Bisphosphatase Exists in a Membrane-Bound Form**—Ruth Alscher-Herman

735 **Ultraviolet Action Spectrum for Anthocyanin Formation in Broom Sorghum First Internodes**—Hiroko Yatsuhashi, Tohru Hashimoto, and Seki Shimizu

742 **pH in Vacuoles Isolated from Castor Bean Endosperm**—Mikio Nishimura

745 **Distribution of Secondary Plant Metabolites and Their Biosynthetic Enzymes in Pea (*Pisum sativum* L.) Leaves. Anthocyanins and Flavonal Glycosides**—Geza Hrazdina, Gerald A. Marx, and Harvey C. Hoch

749 **Identification and Quantitative Analysis on Indole-3-Acetyl-L-Aspartate from Seeds of *Glycine max* L.**—Jerry D. Cohen

754 **Effect of Exogenous and Endogenous Nitrate Concentration on Nitrate Utilization by Dwarf Bean**—Hans Breteler and Per Nissen

760 **Synthesis, Excretion, and Metabolism of Glycolate under Highly Photorespiratory Conditions in *Euglena gracilis* Z**—Akiho Yokota and Shozaburo Kitaoka

765 ***myo*-Inositol-1-Phosphatase from the Pollen of *Lilium longiflorum* Thunb.**—Mary W. Loewus and Frank A. Loewus

771 **Active, Irreversible Accumulation of Extreme Levels of H_2SO_4 in the Brown Alga, *Desmarestia***—Mark McClintock, Noe Higinbotham, Ernest G. Uribe, and Robert E. Cleland

775 **Abscisic Acid Stimulation of Suberization. Induction of Enzymes and Deposition of Polymeric Components and Associated Waxes in Tissue Cultures of Potato Tuber**—Wendell Cottle and P. E. Kolattukudy

781 **Wound-Induced Resistance to Cellulase in Oat Leaves**—Gordon T. Geballe and Arthur W. Galston

788 **Ethylene as an Effector of Wound-Induced Resistance to**

Cellulose in Oat Leaves—Gordon T. Geballe and Arthur W. Galston

791 **Oxygen-Dependent Aging of Seeds**—John B. Ohlrogge and Thomas P. Kernan

795 **Thylakoid Polypeptides on Light and Dark Aged Chloroplasts**—Cesar P. dos Santos and David O. Hall

803 **An Investigation into the Roles of Photosynthesis and Respiration in H^+ Efflux from Aerated Suspensions of *Asparagus* Mesophyll Cells**—Alan W. Bown

811 **Does Ethylene Play a Role in the Release of Lateral Buds (Tillers) from Apical Dominance in Oats?**—Marcia A. Harrison and Peter B. Kaufman

815 **Growth of Photoheterotrophic Cells of Peanut (*Arachis hypogaea* L.) in Still Nutrient Medium**—S. Seeni and A. Gnanam

823 **Carbon Assimilation in Photoheterotrophic Cells of Peanut (*Arachis hypogaea* L.) Grown in Still Nutrient Medium**—S. Seeni and A. Gnanam

827 **Glutamate Synthase Isoforms in Rice. Immunological Studies of Enzymes in Green Leaf, Etiolated Leaf, and Root Tissues**—Akira Suzuki, Jean Vidal, and Pierre Gadal

833 **Enzymological Basis for Herbicidal Action of Glyphosate**—Judith L. Rubin, Charles G. Gaines, and Roy A. Jensen

840 **Inhibition of Oxygen Evolution in Chloroplasts by Ferricyanide**—Zivia Drechsler and Joseph Neumann

844 **Polyamines and Root Formation in Mung Bean Hypocotyl Cuttings. I. Effects of Exogenous Compounds and Changes in Endogenous Polyamine Content**—Ra'anan Friedman, Arie Altman, and Uriel Bachrach

849 **Ethylene Effects on Amylase Activity from Isolated Barley Aleurone Layers. Possible Modification by Proteolytic Enzymes**—Kenneth C. Eastwell and Mary S. Spencer

853 **Inhibition of O_2 Consumption Resistant to Cyanide and Its Development by *N*-Propyl Gallate and Salicylhydroxamic Acid**—Harry W. Janes and Steven C. Wiest

*****

858 **Effects of 2,4-Dinitrophenol on Membrane Lipids of Roots**—Patricia C. Jackson and Judith B. St. John

863 **Phytochrome Action on Chlorophyll Synthesis—A Study of the Escape from Photoreversibility**—Heidemarie Oelze-Karow and Hans Mohr

867 **Localization of Phytochrome in Oats by Electron Microscopy**—Jean-Pierre Verbelen, Lee H. Pratt, Warren L. Butler, and Kiyoteru Tokuyasu

872 **Intracellular Localization of Nitrate Reductase in *Neurospora crassa***—José M. Roldán, Jean-Pierre Verbelen, Warren L. Butler, and Kiyoteru Tokuyasu

875 **Evidence from Studies with Acifluorfen for Participation of a Flavin-Cytochrome Complex in Blue Light Photoreception for Phototropism of Oat Coleoptiles**—Ta-Yan Leong and Winslow R. Briggs

882 **Anesthetic Effects on Secondary Dormancy and Phytochrome Responses in *Setaria faberi* Seeds**—Ray B. Taylorson

887 **Molecular Morphology of Cyanobacterial Phycobilisomes**—Harold W. Siegelman and J. Helen Kycia

898 **Phytochrome Regulation of Flowering in the Long-Day Plant, *Hyoscyamus niger***—Robert J. Downs and Judith F. Thomas

901 **Effect of Far-Red and Green Irradiation on the Nyctinastic Closure of *Albizzia* Leaflets**—Takuma Tanada

905 **Enzymic Mechanism of Starch Breakdown in Germinating Rice Seeds. 11. Ultrastructural Changes in Scutellar Epithelium**—Kazuo Okamoto, T. Murai, G. Eguchi, M. Okamoto, and Takashi Akazawa

912 **Comparative Phytochrome Immunochemistry as Assayed by Antisera against Both Monocotyledonous and Dicotyledonous Phytochrome**—Marie-Michèle Cordonnier and Lee H. Pratt

SHORT COMMUNICATIONS

917 **Cluster Bean—A Ureide- or Amide-Producing Legume?**—Inder S. Sheoran, Yash P. Luthra, Mohinder S. Kuhad, and Randhir Singh

919 **1-Aminocyclopropane-1-Carboxylic Acid Concentrations in Shoot-Forming and Non-Shoot-Forming Tobacco Callus Cultures**—Karen Lee Grady and James A. Bassham

922 **Tissue Distributions of Chlorogenic Acid and of Enzymes Involved in Its Metabolism in Leaves of *Sorghum bicolor***—Mineo Kojima and Eric E. Conn

Number 4. October

927 **Photosynthetic Oxygen Exchange in Isolated Cells and Chloroplasts of C_3 Plants**—Robert T. Furbank, Murray R. Badger, and C. Barry Osmond

932 **Investigation of the Mechanism of Action of a Chlorosis-Inducing Toxin Produced by *Pseudomonas phaseolicola***—Alison G. Smith and Philip H. Rubery

939 **Evidence for Compartmentalization of Conjugates of 2,4-Dichlorophenoxyacetic Acid in Soybean Callus Tissue**—Gayle H. Davidonis, Robert H. Hamilton, and Ralph O. Mumma

943 **Isocitrate Lyase from Flax. Terminal Residues, Composition, Active Site, and Catalysis**—Fazal R. Khan and Bruce A. McFadden

949 **pH Dependence and Kinetics of Glycolate Uptake by Intact Pea Chloroplasts**—Konrad T. Howitz and Richard E. McCarty

953 **Characterization of the Active Sucrose Transport System of Immature Soybean Embryos**—John H. Thorne

959 **Malate Oxidation, Rotenone-Resistance, and Alternative Path Activity in Plant Mitochondria**—Joseph T. Wiskich and David A. Day

965 **Rapid Fractionation of Wheat Leaf Protoplasts Using Membrane Filtration. The Determination of Metabolite Levels in the Chloroplasts, Cytosol, and Mitochondria.**—Ross McC. Lilley, Mark Stitt, Gerhard Mader, and Hans W. Heldt

971 **Adenine Nucleotide Levels in the Cytosol, Chloroplasts, and Mitochondria of Wheat Leaf Protoplasts**—Mark Stitt, Ross McC. Lilley, and Hans W. Heldt

978 **Chloroplast Sulfhydryl Groups and the Light Activation of Fructose-1,6-Bisphosphatase**—Rudolf E. Slovacek and Sharon Vaughn

982 **Phase Shifting of the Circadian Clock by Diethylstilbestrol and Related Compounds in *Neurospora crassa***—Hideaki Nakashima

987 ***In Vitro* Synthesis of the Chlorophyll Isocyclic Ring. Transformation of Magnesium-Protoporphyrin IX and Magnesium-Protoporphyrin IX Monomethyl Ester into Magnesium-2,4-Divinyl Pheoporphyrin a_5**—Barbara M. Chereskin, Yum-Shing Wong, and Paul A. Castelfranco

994 **Sulfite-Induced Lipid Peroxidation in Chloroplasts as Determined by Ethane Production**—Galen D. Peiser, Ma. Concepcion C. Lizada, and Shang Fa Yang

999 **A Simple and Sensitive DNA Assay for Plant Extracts**—Gianni R. Baer, Steven P. Meyers, William T. Molin, and Larry E. Schrader

1004 **Photoinhibition of Reaction Centers of Photosystems I and II in Intact *Bryopsis* Chloroplasts under Anaerobic Conditions**—Kazuhiko Satoh and David C. Fork

1009 ***In Vivo* Nitrate Reduction in Roots and Shoots of Barley (*Hordeum vulgare* L.) Seedlings in Light and Darkness**—Muhammad Aslam and Ray C. Huffaker

1014 **Site of Synthesis of NADPH. Protochlorophyllide Oxidoreductase in Rye (*Secale cereale*)**—W. Trevor Griffiths and Neil S. Beer

1019 **Pigment-Protein Complexes of Illuminated Etiolated Leaves**—Richard P. Oliver and W. Trevor Griffiths

1026 **Photosystem II Activity, Plastoquinone A Levels, and Fluorescence Characterization of a Virescens Mutant of Barley**—David J. Kyle and Saul Zalik

1032 **Transport of Glycerate across the Envelope Membrane of Isolated Spinach Chloroplasts**—Simon P. Robinson

1039 **Senescence in Isolated Carnation Petals. Effects of Indoleacetic Acid and Inhibitors of Protein Synthesis**—George Wulster, John Sacalis, and Harry W. Janes

1044 **Effects of Light and Nutrients on Leaf Size, CO_2 Exchange, and Anatomy in Wild Strawberry (*Fragaria virginiana*)**—Thomas W. Jurik, Jean Fincher Chabot, and Brian F. Chabot

1049 **Salt Tolerance in Crop Plants Monitored by Chlorophyll Fluorescence *In Vivo***—Robert M. Smillie and Robyn Nott

1055 **Allophycocyanin I and the 95 Kilodalton Polypeptide. The Bridge between Phycobilisomes and Membranes**—Mary Rusckowski and Barbara A. Zilinskas

1060 **Isolation and Characterization of the Central Component of the Phycobilisome Core of *Nostoc* sp.**—Barbara A. Zilinskas

1066 **Water Relations of Cotton Plants under Nitrogen Deficiency. V. Environmental Control of Abscisic Acid Accumulation and Stomatal Sensitivity to Abscisic Acid**—John W. Radin, Linda L. Parker, and Gene Guinn

1071 **Cytokinesis, Cell Expansion, and the Potential for Cytokinin-Autonomous Growth in Tobacco Pith**—Robert Turgeon

1075 **Phospholipid Motional Characteristics in a Dry Biological System. A ^{31}P-Nuclear Magnetic Resonance Study of Hydrating *Typha latifolia* Pollen**—David A. Priestley and B. de Kruijff

1079 **Rapid Changes in the Pattern of Electric Current around the Root Tip of *Lepidium sativum* L. following Gravistimulation**—H. M. Behrens, H. Weisenseel, and A. Sievers

1084 **Bacterial Ice Nucleation: A Factor in Frost Injury to Plants**—Steven E. Lindow, Deane C. Arny, and Christen D. Upper

1090 **Relationship between Ice Nucleation Frequency of Bacteria and Frost Injury**—Steven E. Lindow, Susan S. Hirano, William R. Barchet, Deane C. Arny, and Christen D. Upper

1094 **Biosynthesis of Storage Proteins in Developing Rice Seeds**—Hiroshi Yamagata, Toshio Sugimoto, Kunisuke Tanaka, and Zenzaburo Kasai

1101 **Photosynthetic Responses to Irradiance by the Grey Mangrove, *Avicennia marina*, Grown under Different Light Regimes**—Marilyn C. Ball and Christa Critchley

1107 **High Rates of Protein Synthesis by Isolated Chloroplasts**—Leonard E. Fish and Andre T. Jagendorf

1115 **Localization of a Proton-Translocating ATPase on Sucrose Gradients**—Frances M. DuPont, Alan B. Bennett, and Roger M. Spanswick

1120 **Light-Induced H^+ Secretion and the Relation to Senescence of Oat Leaves**—Shimon Gepstein

1125 **Changes in the Activities of Ribulose-1,5-Bisphosphate and Phosphoenolpyruvate Carboxylases in Submersed Aquatic Angiosperms during Aging**—Sasadhar Jana and Monojit Acharyya Choudhuri

1128 **Role of Peroxidase in Lignification of Tobacco Cells. I. Oxidation of Nicotinamide Adenine Dinucleotide and Formation of Hydrogen Peroxide by Cell Wall Peroxidases**—Michael Mäder and Victoria Amberg-Fisher

1132 **Role of Peroxidase in Lignification of Tobacco Cells. II. Regulation by Phenolic Compounds**—Michael Mäder and Resi Füssl

1135 **H^+ Uptake and Extrusion by *Nitella clavata***—Daniel J. Holland and Charles E. Barr

1143 **Effect of Osmotic Stress on Photosynthesis Studied with the Isolated Spinach Chloroplast. Generation and Use of Reducing Power**—Gerald A. Berkowitz and Martin Gibbs

1149 **α-Amylase Secretion by Single Barley Aleurone Layers**—Benjamin A. Moll and Russell L. Jones

1156 **A ^{31}P Nuclear Magnetic Resonance Study of Intracellular pH of Plant Cells Cultivated in Liquid Medium**—Jean-Baptiste Martin, Richard Bligny, Fabrice Rebeille, Roland Douce, Jean-Jacques Leguay, Yves Mathieu, and Jean Guern

1162 **Fluorescence Immunohistochemical Localization of Malate Dehydrogenase Isoenzymes in Watermelon Cotyledons. A Developmental Study of Glyoxysomes and Mitochondria**—Christof Sautter and Bertold Hock

1169 **Kinetic Ramifications of the Association-Dissociation Behavior of NAD Malic Enzyme. A Possible Regulatory Mechanism**—Scott D. Grover and Randolph T. Wedding

1173 **Accumulation of Free Fatty Acids during Hardening of *Chlorella ellipsoidea***—Shoji Hatano, Kiyotaka Kabata, Makoto Yoshimoto, and Haruo Sadakane

1178 **Efficiency of Nitrogen Assimilation by N_2-Fixing and Nitrate-Grown Soybean Plants (*Glycine max* [L.] Merr.)**—Robert L. Finke, James E. Harper, and Richard H. Hageman

1185 **Interaction of Carbon and Nitrogen Metabolism in the Productivity of Maize**—Joan C. Swank, Frederick E. Below, Robert J. Lambert, and Richard H. Hageman

1191 **Biosynthesis, Translocation, and Accumulation of Betaine in Sugar Beet and Its Progenitors in Relation to Salinity**—Andrew D. Hanson and Roger Wyse

1199 **Biochemical Characterization of Canavalin, the Major Storage Protein of Jack Bean**—Stephanie Campbell Smith, Stephen Johnson, James Andrews, and Alexander McPherson

SHORT COMMUNICATIONS

1210 **Isolation of Spinach Leaf Peroxisomes in 0.25 Molar Sucrose Solution by Percoll Density Gradient Centrifugation**—Zheng Liang, Charles Yu, and Anthony H. C. Huang

1213 **Isolation and Purification of Intact Peroxisomes from Green Leaf Tissue**—Mark R. Schmitt and Gerald E. Edwards

1218 **Taxonomic Survey for the Presence of Ribulose-1,5-Bisphosphate Carboxylase Activity in Guard Cells**—William H. Outlaw, Jr., Mitchell C. Tarczynski, and

Loran C. Anderson

1221 Inhibition by Polyamines of Macromolecular Synthesis and Its Implication for Ethylene Production and Senescence Processes—Akiva Apelbaum, Isaac Icekson, Alan C. Burgoon, and Morris Lieberman

1224 Desiccation of Axes of *Phaseolus vulgaris* during Development of a Switch from a Development Pattern of Protein Synthesis to a Germination Pattern—Juthika Dasgupta and J. Derek Bewley

1228 Relationship between Vital Staining and Subculture Growth during the Senescence of Plant Tissue Cultures—Beth A. Smith, Mary L. Reider, and John S. Fletcher

1231 Correction

Number 5. November

1233 Loss of Hydrogen from Carbon 5 of D-Glucose during Conversion of D-[5-^{3}H,6-^{14}C]Glucose to L-Ascorbic Acid *Pelargonium crispum* (L.) L'Her—Michael Grün, Britta Renstrøm, and Frank A. Loewus

1236 Nodule Protein Synthesis and Nitrogenase Activity of Soybeans Exposed to Fixed Nitrogen—K. Dale Noel, Mitchell Carneol, and Winston J. Brill

1242 Reorganization of the Photosystem II Unit in Developing Thylakoids of Higher Plants after Transfer to Darkness. Changes in Chlorophyll *b*, Light-Harvesting Chlorophyll Protein Content, and Grana Stacking—Joan H. Argyroudi-Akoyunoglou, Agapios Akoyunoglou, Kostas Kalosakas, and George Akoyunoglou

1249 Hydrogen Peroxide Synthesis in Isolated Spinach Chloroplast Lamellae. An Analysis of the Mehler Reaction in the Presence of NADP Reduction and ATP Formation—J. Michael Robinson and Martin Gibbs

1255 Some Properties of the Chloroplast Envelope as Revealed by Electrophoretic Mobility Studies of Intact Chloroplasts—C. Ralph Stocking and Vincent R. Franceschi

1260 Phosphatidylglycerol Synthesis in Spinach Chloroplasts. Characterization of the Newly Synthesized Molecule—Salvatore A. Sparace and J. Brian Mudd

1265 Effect of Ethylene on [^{14}C]Indole-3-Acetic Acid Metabolism in Leaf Tissues of Woody Plants—Joseph Riov, Nachum Dror, and Raphael Goren

1271 Measurements of Membrane Potentials in Plant Mitochondria with the Safranine Method—Anthony L. Moore and Walter D. Bonner, Jr.

1277 Nature of Photooxidative Events in Leaves Treated with Chlorosis-Inducing Herbicides—Jürgen Feierabend and Theresia Winkelhüsener

1283 Isoxazolin-5-ones and Amino Acids in Root Exudates of Pea and Sweet Pea Seedlings—Yu-Haey Kuo, Fernand Lambein, Fumio Ikegami, and Roger Van Parijs

1290 Modeling C and N Transport to Developing Soybean Fruits—David B. Layzell and Thomas A. LaRue

1299 Temperature-Induced Fluorescence Changes. A Screening Method for Frost Tolerance of Potato (*Solanum* Sp.)—Erik Sundbom, Martin Strand, and Jan-Erik Hällgren

1303 Growth and Water Relations of Cultured Tomato Cells after Adjustment to Low External Water Potentials—Ray A. Bressan, Avtar K. Handa, Sangita Handa, and Paul M. Hasegawa

1310 Photoinhibition of CO_2-Dependent O_2 Evolution by Intact Chloroplasts Isolated from Spinach Leaves—G. Cornic, K. C. Woo, and C. Barry Osmond

1316 Manipulating the Incorporation of [1-^{14}C]Acetate into Different Leaf Glycerolipids in Several Plant Species—Susan E. Gardiner, P. Grattan Roughan, and C. Roger Slack

1321 Characterization of a Manganese Superoxide Dismutase from the Higher Plant *Pisum sativum*—Francisca Sevilla, Julio López-Gorgé, and Luis A. del Río

1327 Plasmalemma Chloride Transport in *Chara corallina*. Inhibition by 4,4'-Diisothiocyano-2,2'-disulfonic Acid Stilbene—David W. Keifer, Vincent R. Franceschi, and William J. Lucas

1335 Effect of Vanadate, Molybdate, and Azide on Membrane-Associated ATPase and Soluble Phosphatase Activities of Corn Roots—Sean R. Gallagher and Robert T. Leonard

1341 Respiratory and Nitrogenase Activities of Soybean Nodules Formed by Hydrogen Uptake Negative (Hup$^-$) Mutant and Revertant Strains of *Rhizobium japonicum* Characterized by Protein Patterns—Jean Jacques Drevon, Linda Frazier, Sterling A. Russell, and Harold J. Evans

1347 Methionine Synthesis in Lemna. Inhibition of Cystathionine γ-Synthase by Propargylglycine—Gregory A. Thompson, Anne H. Datko, and S. Harvey Mudd

1353 Hydroxyproline-Rich Bacterial Agglutinin from Potato. Extraction, Purification, and Characterization—Jan E. Leach, Michael A. Cantrell, and Luis Sequeira

1359 Two-Dimensional Electrophoretic Mapping of Proteins of Bundle Sheath and Mesophyll Cells of the C_4 Grass *Digitaria sanguinalis* (L.) Scop. (Crabgrass)—Philip A. Harrison and Clanton C. Black

1367 Characteristics and Activity Changes of Proteolytic Enzymes in Apple Leaves during Autumnal Senescence—Seong-Mo Kang, Hiroyuki Matsui, and John S. Titus

1373 Differences between Effects of Undissociated and Anionic 2,4-Dinitrophenol on Permeability of Barley Roots—Patricia C. Jackson

1380 Preparation of Avocado Mitochondria Using Self-Generated Percoll Density Gradients and Changes in Buoyant Density during Ripening—Francois Moreau and Roger Romani

1385 Malate Oxidation and Cyanide-Insensitive Respiration in Avocado Mitochondria during the Climacteric Cycle—Francois Moreau and Roger Romani

1391 Isolation and Transport Properties of Protoplasts from Cortical Cells of Corn Roots—John W. Gronwald and Robert T. Leonard

1396 Isolation and Estimation of Cytokinins and Cytokinin-Containing Transfer RNAs from *Cucumis sativus* L. var. Guntur Seedlings—Chelliah Jayabaskaran and T. Mathai Jacob

1401 Physiology of Movements in Stems of Seedling *Pisum sativum* L. cv Alaska. II. The Role of the Apical Hook and of Auxin in Nutation—Steven J. Britz and Arthur W. Galston

1405 An Assessment of Phase Transitions in Soybean Membranes—Sharman D. O'Neill and A. Carl Leopold

1410 Temperature Effects on Oxidative Metabolism of Dormant Sugar Pine Seeds—J. Brad Murphy and Thomas L. Noland

1413 Mechanism of Photoactivation of Electron Transport in Intact *Bryopsis* Chloroplasts—Kazuhiko Satoh

1417 Factors Affecting the Elicitation of Sesquiterpenoid Phytoalexin Accumulation by Eicosapentaenoic and Arachidonic Acids in Potato—Richard M. Bostock, Roger A. Laine, and Joseph A. Kuć

1425 **Characteristics of Membrane-Bound Lectin in Developing *Phaseolus vulgaris* Cotyledons**—Maarten J. Chrispeels and Roberto Bollini

1429 **Plasma Membranes from Oats Prepared by Partition in an Aqueous Polymer Two-Phase System. On the Use of Light-Induced Cytochrome *b* Reduction as a Marker for the Plasma Membrane**—Susanne Widell, Tomas Lundborg, and Christer Larsson

1436 **Sucrose and Glucose Uptake into *Beta vulgaris* Leaf Tissues. A Case for General (Apoplastic) Retrieval Systems**—Julia W. Maynard and William J. Lucas

1444 **Effects of Aminoacetonitrile on Net Photosynthesis, Ribulose-1,5-Bisphosphate Levels, and Glycolate Pathway Intermediates**—Elisabeth Créach and Cecil R. Stewart

1449 **Effect of Chitosan on Membrane Permeability of Suspension-Cultured *Glycine max* and *Phaseolus vulgaris* Cells**—David H. Young, Harald Köhle, and Heinrich Kauss

1455 **Gas Exchange Characteristics of the Submerged Aquatic Crassulacean Acid Metabolism Plant, *Isoetes howellii***—Jon E. Keeley and George Bowes

1459 **Phosphorylation of the Adenosine Triphosphatase in a Deoxycholate-Treated Plasma Membrane Fraction from Corn Roots**—Donald P. Briskin and Robert T. Leonard

1465 **Simultaneous Oxidation of Glycine and Malate by Pea Leaf Mitochondria**—Griffin H. Walker, David J. Oliver, and G. Sarojini

1470 **Evaluation of H^+ Secretion Relative to Zeatin-Induced Growth of Detached Cucumber Cotyledons**—Cleon W. Ross and David L. Rayle

1475 **Properties of Peach Flower Buds Which Facilitate Supercooling**—Edward N. Ashworth

1480 **Role of Endogenous Growth Regulators in Seed Dormancy of *Avena fatua*. I. Short Chain Fatty Acids**—James D. Metzger and Deborah K. Sebesta

1486 **Correlation between the Lipid Composition and the Responsiveness of *Avena sativa* Stem Segments to Gibberellic Acid**—Manfred Jusaitis, Leslie G. Paleg, and Donald Aspinall

1495 **δ-Aminolevulinic Acid Formation from γ,δ-Dioxovaleric Acid in Extracts of *Euglena gracilis***—Terrence Foley and Samuel I. Beale

1503 **Inhibition of Ethylene Synthesis in Tomato Plants Subjected to Anaerobic Root Stress**—Kent J. Bradford, Theodore C. Hsiao, and Shang Fa Yang

1508 **Stomatal Behavior and Water Relations of Waterlogged Tomato Plants**—Kent J. Bradford and Theodore C. Hsiao

1514 **Evidence for the Glutamine Synthetase/Glutamate Synthase Pathway during the Photorespiratory Nitrogen Cycle in Spinach Leaves**—K. C. Woo, J. F. Morot-Gaudry, R. E. Summons, and C. Barry Osmond

1518 **Effect of the Intensity and Duration of Light at Various Temperatures on the Germination of *Oldenlandia corymbosa* L. Seeds**—Françoise Corbineau and Daniel Côme

1521 **Characterization of Lignin *in Situ* by Photoacoustic Spectroscopy**—J. Michael Gould

1526 **Oleate Desaturation in Young Winter Wheat Root Tissue**—Claude Willemot and Jacques Labrecque

1530 **Influence of Light on the Heat Sensitivity of the Photosynthetic Apparatus in Isolated Spinach Chloroplasts**—Engelbert Weis

1535 **Effect of Osmotic Stress on Photosynthesis Studied with the Isolated Spinach Chloroplast. Site-Specific Inhibition of the Photosynthetic Carbon Reduction Cycle**—Gerald A. Berkowitz and Martin Gibbs

1541 **Limiting Factors in Photosynthesis. III. Effects of Iron Nutrition on the Activities of Three Regulatory Enzymes of Photosynthetic Carbon Metabolism**—Scott E. Taylor, Norman Terry, and Robert P. Huston

1544 **Effect of Pod Removal on Leaf Senescence in Soybeans**—Vernon A. Wittenbach

1549 **Growth and Chromatic Adaptation of *Nostoc* sp. Strain MAC and the Pigment Mutant R-MAC**—Judith A. Kipe-Nolt, S. Edward Stevens, Jr., and Donald A. Bryant

1554 **Localization of Filipin-Sterol Complexes in the Membranes of *Beta vulgaris* Roots and *Spinacia oleracea* Chloroplasts**—Curt H. Moeller and J. Brian Mudd

SHORT COMMUNICATIONS

1562 **Terpenoid Metabolism in Plastids. Localization of α-Tocopherol Synthesis in *Capsicum* Chromoplasts**—Bilal Camara, Françoise Bardat, Ababacar Seye, Alain D'Harlingue, and René Monéger

1564 **Screening and Selection of Maize to Enhance Associative Bacterial Nitrogen Fixation**—Stephen W. Ela, Mary Ann Anderson, and Winston J. Brill

1568 **Auxin Uptake and the Rapid Auxin-Induced Growth in Isolated Sections of *Helianthus annuus***—Richard D. Firn

1571 **Endosperm and Pericarp Involvement in the Supercooling of Imbibed Lettuce Seeds**—June E. Bourque and Stephen J. Wallner

1574 **Identification of Abscisic Acid in *Tulipa gesneriana* L. by Gas-Liquid Chromatography with Electron Capture and Combined Gas-Liquid Chromatography and Mass Spectrometry**—Paul H. Terry, Louis H. Aung, and August A. De Hertogh

Number 6. December

1577 **Succinate Dehydrogenase. A Partial Purification from Mung Bean Hypocotyls and Soybean Cotyledons**—John J. Burke, James N. Siedow, and Donald E. Moreland

1582 **Profile of Basic Carbon Pathways in Guard Cells and Other Leaf Cells of *Vicia faba* L.**—Rüdiger Hampp, William H. Outlaw, Jr., and Mitchell C. Tarczynski

1586 **Structure of Plant Cell Walls. XII. Identification of Seven Differently Linked Glycosyl Residues Attached to O-4 of the 2,4-Linked L-Rhamnosyl Residues of Rhamnogalacturonan I**—Michael McNeil, Alan G. Darvill, and Peter Albersheim

1592 **Effects of Exogenous 1,3-Diaminopropane and Spermidine on Senescence of Oat Leaves. I. Inhibition of Protease Activity, Ethylene Production, and Chlorophyll Loss as Related to Polyamine Content**—Liu-Mei Shih, Ravindar Kaur-Sawhney, Jürg Fuhrer, Swapna Samanta, and Arthur W. Galston

1597 **Effects of Exogenous 1,3-Diaminopropane and Spermidine on Senescence of Oat Leaves. II. Inhibition of Ethylene Biosynthesis and Possible Mode of Action**—Jürg Fuhrer, Ravindar Kaur-Sawhney, Liu-Mei Shih, and Arthur W. Galston

1601 **Nitrogen Fixation Associated with Rinsed Roots and Rhizomes of the Eelgrass *Zostera marina***—Douglas G. Capone and John M. Budin

1605 **Genome Expression during Normal Leaf Development. 2. Direct Correlation between Ribulose Bisphosphate**

Carboxylase Content and Nuclear Ploidy in a Polyploid Series of Wheat—Caroline Dean and Rachel M. Leech

1609 Nitrogenase Activity Associated with Roots and Stems of Field-Grown Corn (*Zea mays* L.) Plants—Helvecio De-Polli, Charles D. Boyer, and Carlos A. Neyra

1614 Metabolism of Tritiated Gibberellin A_{20} in Maize—Stewart B. Rood, Masaji Koshioka, Trevor J. Douglas, and Richard P. Pharis

1619 Ontogenetic Variation of Four Cytokinins in Soybean Root Pressure Exudate—Josephine C. Heindl, Dale R. Carlson, William A. Brun, and Mark L. Brenner

1626 A Comparative Study of the Physiology of Symbioses Formed by *Rhizobium japonicum* with *Glycine max*, *Vigna unguiculata*, and *Macroptilium atropurpurem*—Harold H. Keyser, Peter van Berkum, and Deane F. Weber

1631 Role of Cytokinin in Differentiation of Secondary Xylem Fibers—Roni Aloni

1634 Estimation of Osmotic Parameters Accompanying Zeatin-Induced Growth of Detached Cucumber Cotyledons—David L. Rayle, Cleon W. Ross, and Nina Robinson

1637 Regulation by Amino Acids of Photorespiratory Ammonia and Glycolate Release from *Ankistrodesmus* in the Presence of Methionine Sulfoximine—Marie Larsson, Carl-Magnus Larsson, and Wolfram R. Ullrich

1641 Biochemical Changes that Occur during Senescence of Wheat Leaves. I. Basis for the Reduction of Photosynthesis—Pamela J. Camp, Steven C. Huber, John J. Burke, and Donald E. Moreland

1647 Characterization of the α-Amylases Synthesized by Aleurone Layers of Himalaya Barley in Response to Gibberellic Acid—John V. Jacobsen and Thomas J. V. Higgins

1654 Sources, Fluxes, and Sinks of Nitrogen during Early Reproductive Growth of Maize (*Zea mays* L.)—Thomas W. Crawford, Jr., Victor V. Rendig, and Francis E. Broadbent

1661 Enantiomeric Form of *myo*-Inositol-1-Phosphate Produced by *myo*-Inositol-1-Phosphate Synthase and *myo*-Inositol Kinase in Higher Plants—Mary W. Loewus, Ken Sasaki, Alan L. Leavitt, Ling Munsell, William R. Sherman, and Frank A. Loewus

1664 Biosynthesis of Indol-3-yl-acetyl-*myo*-inositol Arabinoside in Kernels of *Zea mays* L.—Luis J. Corcuera and Robert S. Bandurski

1667 Spectral Evidence for a Component Involved in Hydrogen Metabolism of Soybean Nodule Bacteroids—Günter Eisbrenner and Harold J. Evans

1673 Non-Mendelian Inheritance of 3-(3,4-Dichlorophenyl)-1,1-dimethylurea-Resistant Thylakoid Membrane Properties in *Chlamydomonas*—Ruth E. Galloway and Laurens Mets

1678 Characterization of Mitochondrial DNA in *Citrus*—Agustín Fontarnau and José Hernández-Yago

1683 Rhythms in Glutamine Synthetase Activity, Energy Charge, and Glutamine in Sunflower Roots—Thomas J. Knight and Gerard S. Weissman

1689 Fatty Acid Composition and Nitrate Uptake of Soybean Roots during Acclimation to Low Temperature—Deanna L. Osmond, Richard F. Wilson, and C. David Raper, Jr.

1694 Characterization of a Proton-Translocating ATPase in Microsomal Vesicles from Corn Roots—Frances M. DuPont, Debra L. Giorgi, and Roger M. Spanswick

1700 Effect of Fusicoccin on Dark $^{14}CO_2$ Fixation by *Vicia faba* Guard Cell Protoplasts—Peter H. Brown and William H. Outlaw, Jr.

1704 Ploidy Effects in Isogenic Populations of Alfalfa. I. Ribulose-1,5-bisphosphate Carboxylase, Soluble Protein, Chlorophyll, and DNA in Leaves—Steven P. Meyers, Stacy L. Nichols, Gianni R. Baer, William T. Molin, and Larry E. Schrader

1710 Ploidy Effects in Isogenic Populations of Alfalfa. II. Photosynthesis, Chloroplast Number, Ribulose-1,5-bisphosphate Carboxylase, Chlorophyll, and DNA in Protoplasts—William T. Molin, Steven P. Meyers, Gianni R. Baer, and Larry E. Schrader

1715 Ploidy Effects in Isogenic Populations of Alfalfa. III. Chloroplast Thylakoid-Bound Coupling Factor 1 in Protoplasts and Leaves—Steven P. Meyers, William T. Molin, Bruce R. Selman, and Larry E. Schrader

1718 Light-Stimulated Burst of Carbon Dioxide Uptake following Nocturnal Acidification in the Crassulacean Acid Metabolism Plant *Kalanchoë daigremontiana*—Klaus Winter and John D. Tenhunen

1723 Potassium Transport in Corn Roots. I. Resolution of Kinetics into a Saturable and Linear Component—Leon V. Kochian and William J. Lucas

1732 Subcellular Localization of a UDP-Glucose:Aldehyde Cyanohydrin β-Glucosyl Transferase in Epidermal Plastids of *Sorghum* Leaf Blades—Eve Syrkin Wurtele, Susan S. Thayer, and Eric E. Conn

1738 Characterization of *In Vitro* Proton Pumping by Microsomal Vesicles Isolated from Corn Coleoptiles—Irvin J. Mettler, Suzanne Mandala, and Lincoln Taiz

1743 Localization of the Proton Pump of Corn Coleoptile Microsomal Membranes by Density Gradient Centrifugation—Suzanne Mandala, Irvin J. Mettler, and Lincoln Taiz

1748 Characterization of the Formation and Distribution of Photosynthetic Products by *Sedum praealtum* Chloroplasts—George J. Piazza, Marsha G. Smith, and Martin Gibbs

SHORT COMMUNICATIONS

1759 Isolation and Immunochemical Characterization of Plant Glutamine Synthetase in Alfalfa (*Medicago sativa* L.) Nodules—R. Gene Groat and Larry E. Schrader

1762 Occurrence of Nitrate Reductase Inhibitor in Rice Plants—Chee Chiew Leong and Teh-Chien Shen

1764 Membrane Lipid Physical Properties in Annuals Grown under Contrasting Thermal Regimes—Carl S. Pike

1767 Synthesis of Oat Globulin Precursors. Analogy to Legume 11S Storage Protein Synthesis—A. Chris Brinegar and David M. Peterson
